1. Do you use AI in your work

- Yes 5
- No 0

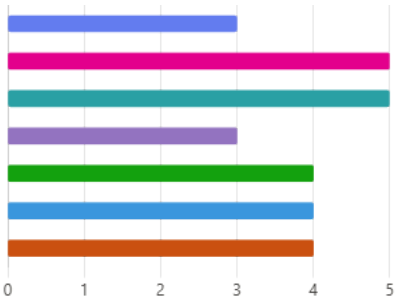

2. Why don't you use AI yet

0  
Svar

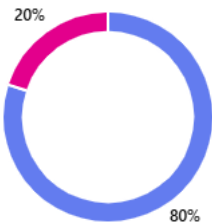

3. If you use AI in your work, where do you use it?

- Idea development and structuring 3
- Formulation and language improvement 5
- Literature search or summarization 5
- Coding, statistics or debugging 3
- Project management, notes or meeting prep 4
- Quality assurance, critique or sparring 4
- Research applications 4

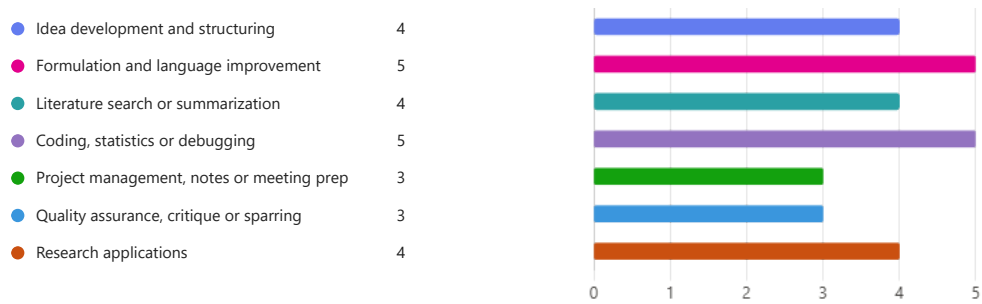

4. Have you discussed use of AI in your group / section?

- Yes 4
- No 1

5. If your section uses AI in their work, where do they use it?

6. What are the primary barriers preventing you or your team from using AI more effectively?

|                                                                         |   |
|-------------------------------------------------------------------------|---|
| Data privacy/confidentiality concerns (GDPR, proprietary research data) | 0 |
| Lack of clarity on DTU guidelines/policies                              | 0 |
| Lack of technical skills/training                                       | 0 |
| Inaccuracy/hallucinations (reliability of output)                       | 0 |
| Ethical concerns (bias, plagiarism, academic integrity)                 | 0 |

7. If AI increases productivity and quality should we embrace it?

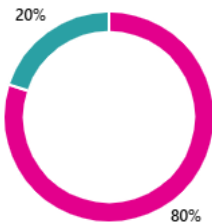

8. If AI increases productivity and quality do researchers have an obligation to actually looking into using it?

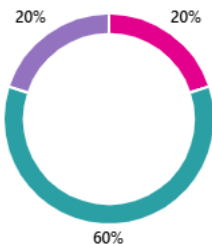

9. Are DTU doing enough to integrate AI in our everyday research?

|              |   |
|--------------|---|
| ● Yes        | 0 |
| ● No         | 4 |
| ● Don't know | 1 |

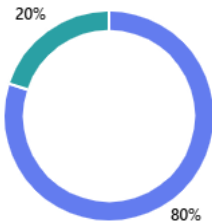

10. Should employees pay for their own licenses?

|                |   |
|----------------|---|
| ● Yes          | 0 |
| ● Partially    | 1 |
| ● No           | 3 |
| ● I'm not sure | 1 |

11. Should DTU establish a dedicated task force or support hub to help research groups implement AI?

|                |   |
|----------------|---|
| ● Yes          | 4 |
| ● No           | 0 |
| ● I'm not sure | 1 |

12. AI Educational & Student Integration

|                                                                         |   |
|-------------------------------------------------------------------------|---|
| ● It should be explicitly banned for students                           | 0 |
| ● It should be allowed only for specific tasks (e.g., grammar checking) | 1 |
| ● Students should be actively taught how to use it responsibly          | 5 |
| ● We need clear, standardized DTU guidelines before deciding            | 1 |

13. Strategic Vision: what impact will AI have on your research field over the next 3 years?

- Revolutionary (It will fundamentally change how we do research) 4
- Moderate (It will speed up tasks, but core methods remain the same) 3
- Minimal (It is a minor tool with limited application in my field) 0
- We need clear, standardized DTU guidelines before deciding 0

14. Should we develop an internal course on how to use AI and how to set it up?

- Yes 3
- No 0
- Maybe 2
